

Dobsuli - 1.m
Art with English Specialisation Class

My name is Murgulyné Lakatos Melinda. I have dreamed of becoming a teacher since kindergarten and I have done everything to make my dream come true. After graduating at highschool, I worked in a school in a little village where I have collected a lot of experiences. These convinced me to become a teacher. I studied Primary Education with Hungarian specialisation in Budapest. I have worked Dobsuli for more than 20 years. When I arrived at this school, I immediately knew that I am in the right place. I am surrounded by excellent and helpful colleagues.

I find it essential that kids at our school feel good and come to school happily. My students think I am a 'cuddling type of teacher' who is always ready to give a hug. My former students keep on doing this too.

It is essential that kids become proficient at Reading, Writing and Maths. In addition, one of my goals is that students become readers. We read a lot of stories where they can use their imagination that is limitless at this age. Tales make children love reading and they can be used for moral and aesthetic education as well. I make my lessons interesting and funny using playful activities too.

Developing fine motoric skills is crucial in a child's life especially regarding writing. That is the reason why we use a number of artistic techniques. The beautiful pieces we create make both children and their parents satisfied.

As a class teacher, my role is to support the personal development of each student as well as to build a good community through class trips and programs.

Being a mother helps understanding both sides of child-teacher and child-parent relationships.

My goal is that children *learn to learn*, think, manage their time and communicate with their peers and the adults.

I am looking forward to meeting the new first graders.
